EXPERIENCE

Lead Quality Assurance Specialist

Astra Interactive Studios

📅 05/2024 - Present 📍 Legazpi, Albay, Philippines

- Perform manual testing on various products, including blockchain-integrated games.
- Develop and execute test cases, scripts, and plans; identify, document, and track bugs.
- Validate smart contracts and blockchain interactions, ensuring seamless performance.
- Collaborate with stakeholders to define and document clear, testable system requirements.
- Monitor developers' progress on GitHub, lead developer meetings, and conduct quality checks on the company's website.

Software Engineer

MetaGaming Guild

📅 09/2023 - 04/2024 📍 Legazpi, Albay, Philippines

- Design and execute test plans, cases, and scripts to identify software defects in game development.
- Conduct thorough regression testing to ensure game stability after bug fixes or updates.
- Collaborate with game designers, developers, and artists to provide quality and user experience feedback.
- Create and maintain documentation for testing processes, bug tracking, and test results.
- Participate in cross-functional meetings to discuss and resolve QA-related concerns and improvements.

Software Engineer

SparkPoint Technologies Inc

📅 03/2021 - 08/2023 📍 Legazpi, Albay, Philippines

- Create project documentations, evaluate, analyze, and define requirements for blockchain-integrated software/web applications.
- Write, test, update, and maintain source code and APIs; perform system maintenance and identify software issues.
- Develop software verification plans, QA standards, and procedures; perform UAT, user experience, and regression testing.
- Conduct daily scrum meetings, guide junior developers, and document issues on GitHub and JIRA.

Software Engineer

TechnoPro Engineering

📅 12/2019 - 12/2020 📍 Shinagawa, Tokyo, Japan

- Gather data, analyze requirements, and perform system analysis before project initiation.
- Create wireframes, prototypes, UI/UX designs, and user flow diagrams.
- Develop, update, and maintain project documentation and technology stack identification.
- Write, test, and maintain code; conduct comprehensive testing and quality assessments.
- Collaborate with developers, present daily progress, and maintain website and source code.

SUMMARY

With over 7 years of experience in Software Engineering and Quality Assurance, I excel in integrating disciplines for exceptional results. My meticulous testing methodologies and use of cutting-edge tools ensure rigorous testing, swift defect identification, and continuous improvement for superior user experiences.
