

# JOHN ANTHONY BALBIN

## Software Engineer

A multidisciplinary skilled QA Engineer with 6 years of experience in the field. I possess a strong understanding of software testing methodologies and tools. My expertise lies in creating and executing comprehensive test plans, performing regression and user acceptance testing, and identifying and documenting defects in software products.

### ACHIEVEMENTS

- 2016  
*Civil Service Exam Passer (Professional)*
- 2018-2019  
*Passed and became a crosschecker for CAN/HVPM projects in DENSO TECHNO PH.*
- 2021 – 2023  
*Successfully launched SparkSwap's decentralized applications with minimal to zero defects.*

### PROFESSIONAL EXPERIENCE

- **SparkPoint Technologies and MetaGaming Guild | Lead QA Specialist**  
*2021– Present*  
Key responsibilities:
  - Ensuring the integrity of blockchain-based software projects before launch, defining project requirements, testing and reporting issues on GitHub and JIRA, tracking progress, prioritizing issues, training junior QA specialists, and leading daily scrum meetings.
  - The task involves identifying the requirements for MetaGaming Guild's Genesis NFT Collection, and pitching it to prominent investors. Additionally, the job involves providing consultancy services for NFT projects.
- **TechnoPro Engineering, Japan | Web Developer**  
*2019 – 2020*  
Key responsibilities:
  - The tasks involve creating wireframes, prototypes, style guides, and user flows to communicate ideas, collaboration with other developers in website development, present daily progress to team leaders, and continually update and maintain the website.
- **Denso Techno Philippines Inc. | Software Engineer**  
*2017 – 2019*  
Key responsibilities:
  - The tasks involve performing source code reviews, comparing source code with specifications, designing test patterns, conducting automated tests, analyzing NG results, debugging detected bugs, and performing self-check and cross-check.

### TOP SKILLS

- Knowledge of software testing methodologies
- Proficiency in test case creation, execution, and reporting
- Understanding of Agile development methodologies and processes
- Familiarity with programming languages such as C, C++ or JavaScript
- Knowledge of defect tracking and management tools such as JIRA or GitHub
- Understanding of web technologies such as HTML, CSS, and JavaScript
- Familiarity with version control systems like Git
